

Michigan QSO Party (MiQP)

Sponsored by the Mad River Radio Club

- 1) **Object:** For amateurs outside the state of Michigan to make contact with as many Michigan stations as possible. Non-Michigan stations may work only Michigan stations, while Michigan stations may contact anyone.
- 2) **Contest Period:** The Michigan QSO Party occurs on the Saturday of the third full weekend in April. For the year 2011, the contest will start on Saturday, April 16, 2011. The contest period runs from 1200 EDST to 2400 EDST (16Z Saturday until 04Z Sunday). All stations may operate the full twelve hours.
- 3) **Frequency Bands and Modes:** CW and SSB on 80, 40, 20, 15 and 10 meters. Stations may be worked once per band and mode; i.e., K8CC may be worked on both 40 CW and 40 SSB for QSO points credit.
- 4) **Entry Categories:**
 - (a) **Single Operator** – Entries where one person performs all operating and logging functions. Use of spotting nets (operator arrangements involving assistance through DX-alerting nets, PacketCluster or Internet) is not permitted. Single operators who receive any form of assistance such as spotting nets are classified as multi-operator. Only one (1) transmitted signal on the air at any time. Single operator entries will be categorized by output power: **QRP** (less than 5W output), **Low Power** (less than 100W output) or **High Power** (greater than 100W output).
 - (b) **Multi Operator** – Entries where more than one operator performs the operating and logging functions. Multi-operator entries must operate under a single callsign. Multi-operator entries are categorized by the number of transmitted signals on the air at any one time: **Single-Transmitter** (one transmitted signal) or **Multi-Transmitter** (multiple transmitted signals).
 - (c) **Mobile** – Entries which are self-contained (radio, antenna, and power source) and capable of motion while in operation. Motion is not required. Mobile entries are categorized by the number of operators: **Solo-Operator** (one person performs all the operating, logging, driving and navigation functions), or **Multi-Operator** (may have multiple persons performing the operating, logging, driving and navigation functions). All mobile entries are limited to a single transmitter of 100W output or less. Mobile entries may submit separate logs for each geographic area activated, or a single overall log. If a single log is submitted, the county operated from must be shown clearly for each QSO.
 - (d) **Emergency Operations Center (EOC) Station** – Michigan entries located at an established EOC site, activated by an individual or group. An EOC category entry may utilize permanently installed equipment and antennas, or equipment/antennas temporarily installed at the EOC for the event. EOC entries are not categorized by the number of transmitters, the power used, or the number of operators.
- 5) **Contest Exchange:**
 - (a) Michigan stations send a sequential serial number beginning with 001, and their Michigan county. All Michigan stations are encouraged to use the official MiQP county abbreviation in their exchange on CW.
 - (b) Non-Michigan W/VE stations (including KH6/KL7) send a sequential serial number beginning with 001, and their state or province.
 - (c) DX stations outside of W/VE send a sequential serial number beginning with 001, and “DX”.

- (d) Mobile stations are allowed to maintain a continuous sequence of serial numbers for all contacts, or may begin with serial number 001 for each separate geographic area activated. The only requirement is that no serial number be repeated within one geographic area.

6) **Scoring:**

- (a) **QSO Points** – Each complete non-duplicate SSB contact is worth one point. Each complete non-duplicate CW contact is worth two points. Duplicate contacts are worth zero points.
- (b) **Multipliers** – Multipliers are counted once per mode. Working the same multiplier on both CW and SSB counts as two multipliers.
1. For Michigan stations, multipliers are 49 American states (excluding Michigan), 83 Michigan counties and 14 Canadian provinces (NL, NB, NS, PE, QC, ON, MB, SK, AB, BC, NT, YT, NU). DX stations do not have any multiplier credit, but may be worked for QSO points credit.
 2. For all other stations, multipliers are the 83 Michigan counties.
- (c) **Final Score** – For non-mobile stations, multiply QSO points by the total number of multipliers. For mobile stations, multiply the total QSO points from all counties activated by the total number of unique multipliers worked from all counties activated.
- (d) **Club Competition** – Scores attributed to any amateur radio club will be credited towards that club. All clubs with two or more credited scores will be included in an overall ranking of those scores with a certificate awarded to the club with the highest score. It is not necessary for the club to submit a roster or list of claimed entrants. Michigan and non-Michigan clubs will be ranked separately.

As the sponsoring club of the MiQP, the Mad River Radio Club is excluded from this competition, although its members may attribute their scores for other Michigan clubs to which they belong.

7) **Suggested Frequencies:**

CW – 3.545, 7.045, 14.045, 21.045 and 28.045. SSB – 3.800, 7.200, 14.250, 21.300 and 28.450. Fixed stations are urged to call CQ away from these frequencies to keep them clear for mobile stations. Look for 28 MHz activity during the even-numbered daylight hours, and 21 MHz activity during the odd-numbered daylight hours. Look for SSB activity on the hour and CW on the half hour.

8) **Miscellaneous:**

- a) Callsigns and exchanged information must be received and confirmed by both stations for a complete QSO.
- b) No cross-mode contacts – CW contacts must be made in the CW portions of the band.
- c) A station (fixed or mobile) used to make one or more MiQP QSOs may not be subsequently used under any other callsign to make MiQP QSOs. The one exception to this are family stations where more than one call is assigned. No individual shall make MiQP QSOs utilizing more than one callsign from a single station.
- d) Operators of a multi-operator station may not make MiQP QSOs with that station from another location (fixed or mobile), regardless of the location the QSOs are made from or the callsign used for the QSOs.
- e) Portable stations are categorized the same as fixed stations. All contacts for a given portable entry must be made from a single county, state or province. A portable station may change locations during the contest (subject to rule 8.e below) and operate from multiple counties, states or provinces, each of which is a separate entry.

- f) Mobile or portable stations that change geographic area (counties for Michigan stations, state or province for others) are considered to be a new station and may be contacted again for QSO points and multiplier credit. No station may claim simultaneous operation in more than one county, state, or province. A mobile or portable station must move a minimum of 500 feet before claiming to be in a new county, state or province.

9) **Reporting:**

- (a) A minimum MiQP entry consists of a log of all contacts made and an entry summary.

Logs must clearly indicate band, mode, date and time, received callsign and both sent and received exchanges for all QSOs. All entries are encouraged to use the official MiQP county abbreviation for logging the received exchange from Michigan stations.

The entry summary must at a minimum show the entrant's callsign, operating location (county, state or province) and mailing address. Michigan entries that are members of a Michigan club should indicate such on their summary sheet so that their score may be credited to their club.

All logs will be re-scored by the MiQP Contest Committee so scoring the log and reporting a claimed score is optional.

- (b) All entries are encouraged to submit their entry in computer-readable format. MiQP is supported by both the NA and TRLog contest logging programs. Entries may be submitted in the native file formats for NA (.QDF) or TRLog (LOG.DAT), Cabrillo or a plain ASCII file. Electronic entries in TRLog or plain ASCII formats must also include an ASCII summary sheet file (no word processor documents). Entries may be submitted via e-mail to logs@miqp.org or on an IBM compatible, MS-DOS formatted 3½ inch diskette to the contest address in section 9.f.
- (c) All entries (hardcopy or electronic) must be postmarked no later than 30 days after the end of the contest. No late entries can be accepted so that the results can be published in a timely manner.
- (d) Entry forms (rules, summary sheet, log sheet and county abbreviations) are available for downloading in MS-Word format from the MiQP web site at <http://www.miqp.org>.
- (e) Final results of the contest will be posted on the MiQP web site. A hard copy of the final results can be obtained by sending a business size SASE to the contest address in section 9.f.
- (f) Paper logs or diskettes are to be sent to: Mad River Radio Club, c/o Dave Pruett, 2727 Harris Road, Ypsilanti, MI 48198.

10) **Awards:**

- (a) Plaques will be awarded for the top entry in the following categories:

- High Score – Michigan Single Operator - High Power
- High Score – Michigan Single Operator - Low Power
- High Score – Michigan Single Operator - QRP
- High Score – Michigan Multi-Operator – Single Transmitter
- High Score – Michigan Multi-Operator – Multi Transmitter
- High Score – Michigan Mobile – Solo Operator
- High Score – Michigan Mobile – Multi Operator
- High Score – Michigan Emergency Operations Center Station
- High Score – Non-MI Single Operator – Eastern/Central Time Zone
- High Score – Non-MI Single Operator – Mountain/Pacific Time Zone

- (b) Certificates will be awarded to the top single-op entry from each Michigan county making at least 50 QSOs.

- (c) Certificates will be awarded to the top single-op entry from each state, Canadian province, and DXCC country making at least 25 QSOs.
- (d) Certificates will be awarded to the 2nd and 3rd place finishers from Michigan in the multi-single, multi-multi, mobile-solo and mobile-multi categories.
- (e) A certificate will be awarded to the highest scoring Michigan and non-Michigan club in the Club Competition described in section 6.D.
- (f) The single operator who works the highest number of unique Michigan counties in the contest will be awarded a certificate. Separate awards will be given for Michigan and out-of-state entries.
- (g) The Michigan Single-Operator participating in their first MiQP and who submits the highest score will be awarded the 'MiQP Rookie Of The Year' plaque.

Comments:

I have observed all competition rules as well as all regulations for amateur radio in my country. My report is correct and true to the best of my knowledge. I agree to be bound by the decisions of the Michigan QSO Party contest committee.
